PROJECTS

- **Buddies - A Rental Platform** Github
React, Redux, Axios, Tailwind CSS, Node.js, Express, MongoDB, Postman, Cloudinary
 - Built a Rental Platform for finding and renting Flats/PGs/Hostels. Especially Designed for students and working professionals.
 - The platform allows students to fill property details, thus enabling students to help other students. Property is listed only after verification and owner permission, also owners can list their property directly.
 - It eliminates the need for middlemen and includes features like Maps API integration for property distance from college/company and nearest railway station for commuting.
- **Green Your Bills**
ASP.NET, SQL Server, Azure, Postman
 - Hospital Management System combined with Bill Generation features. The platform primarily serves healthcare providers in handling patient management, insurance claims, billing, and reporting.
